

WHY WORK WITH US?

Collaborate with industry peers on key issues to promote responsible supply chain management and better ethical business practices across the industry.

WHAT WE DO

The PSCI members work together to build a responsible supply chain, including:

- A common voice across our industry
- Guidelines for ethics, human rights & labor, health & safety, environment and management systems
- Supplier capability conferences, webinars and a resource library
- Frameworks for a common supplier assessment including supplier audit questionnaire and report templates
- A shared audit platform to reduce the burden on the industry and drive continuous improvement

WHO CAN JOIN?

All companies that manufacture medical products or provide materials or scientific research to the pharmaceutical, biotech or medical devices industries.

Members must share our vision for excellence in safety, environmental, and social outcomes across the whole of the global pharmaceutical and healthcare supply chain.

More information on membership can be found at pscinitiative.org/membership.

PSCI Spring Meeting, hosted by Sanofi in France (2019)

OUR MEMBERS

The PSCI's membership includes major pharmaceutical and healthcare companies from across the industry.

Updated Sept 2021

Working together to create a better supply chain in the pharmaceutical and healthcare industries.

THE VISION

The Pharmaceutical Supply Chain Initiative (PSCI)

is a group of pharmaceutical and healthcare companies who share a vision of excellence in safety, environmental, and social outcomes across the whole of the global pharmaceutical and healthcare supply chain.

We believe that collectively PSCI members can share knowledge and expertise, across our industry, to drive complex, global change more effectively than any one organization alone.

We have joined forces to promote responsible supply chain management and better business conditions across the industry.

PSCI Supplier Conference China (2019)

THE PRINCIPLES

The PSCI Principles for Responsible Supply Chain Management articulate the industry's guidelines across five areas of responsible business practice: Ethics, Human Rights & Labor, Health & Safety, Environment, and Management Systems.

Each of the five areas establishes the relevant standards that any organization operating within the pharmaceutical supply chain is expected to uphold. The Principles can be voluntarily supported by any organization in the pharmaceutical industry.

ETHICS

HUMAN RIGHTS
AND LABOR
